*** This year, the Easter weekend begins on Friday April 2nd thru Monday April 5th. Many bidders request Time off during this period which in turn places a demand on the PBS system to cover the flying at the base. This will usually result in unstacking being triggered.

Since we have traditionally seen a high degree of unstacking during this Statutory holiday, you may wish to consider bidding pairings after your Time off requests. This way, if you are not senior enough to hold your Time off requests, the system can peruse your bids to unstack you from your bidsheet as opposed to randomly awarding.

FYI, the next Base Meeting is scheduled on April 15th.
